

## “Better By Design”

### Industrial Reducers

#### TECHNICAL DATA SHEET

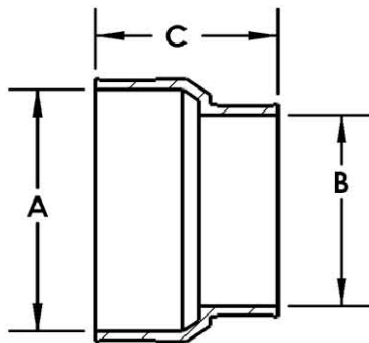

- 1 Reducers for secondary pipe sizes 6” and over are considered industrial reducers. These reducers are manufactured from Alcryn (UL listed to 1996 protocols) or polyurethane (UL listed in split repairs to 2004 protocols).

When manufactured out of polyurethane, the reducers may be split and rebounded using solvent weld kit CH-DGK 4, to form custom sizes, consult factory.

These reducers are available to ANSI nominal sizes and many metric sizes. These reducers are also used as a component in the industrial penetrations.

Alcryn is UV resistant material.

Part Number	A	B	C
IN-RA 6x4	6”	4”	7”
IN-RA 8x4	8”	4”	7”
IN-RA 8x6	8”	6”	7”
IN-RA 10x6	10”	6”	7”
IN-RA 10x8	10”	8”	7”
IN-RA 12x6	12”	6”	7”
IN-RA 12x8	12”	8”	7”
IN-RA 12x10	12”	10”	7”

#### THIRD PARTY APPROVALS

Alcryn 1996 Protocols  
Pellethane 2004 Protocols
