

"Better By Design"

Dri-Sump Mounting Kit

Technical Data Sheet

The Dri-sump Tightness testing protocol and technology incorporates a schedule 40 free standing 3/4" rigid PVC sensor that is accessible at grade level. It is convenient to attach the sensor tube to the containment sump being monitored. Diversified has developed a accessory kit to accommodate the mounting and attachment of the Accent provided sensor technology. These kits attach to all DPM sumps and will mount to any standard Unistrut.

All components are either UL Listed or third party approved for their respective applications.

The SU-DSK Dr -Sump kit includes a powder coated steel mounting bar, molded conduit clamp for 3/4" rigid conduits and necessary nut, bolts and washer. Available in Stainless where requested.

The SU DSK is shipped loose for field mounting. The kit will be mounted at the factory when requested by the customer at no charge.

Picture shows a segment of a 3/4" rigid steel conduit for demonstration purposes only.

Only items shown are provided in the SU-DSK.

Mounting Bar

3/8-16 Bolt
